

Dear Customers,

RST is pleased to invite all our business partners to visit the RST booth at the Eurobike Demo Day to be held on August 31 in Ratzenried, Germany.

The Eurobike Demo Day offers a great chance for the bike industry to present their products for real road testing and for the exchange of the latest product information. At this event, you will have the chance to test the most innovative product – the RST Wireless Remote Control System. The pioneering “Wireless” system, the first step for future bike technologies. Also we prepare several well-established brand bicycles with a RST suspension fork for riding test.

We look forward to your visit and see you soon Ratzenried!

Sincerely Yours,

RST Team
